

New Framework

Encouraging your child to learn to swim from a young age is one of the most important life skills you can give them and if they enjoy the water from a young age they will do so for the rest of their lives.

The new Scottish Swimming Framework is designed to teach children through fun, playing games and other activities in the pool that will help them learn core swimming skills such as breathing, submerging and moving in the water. Swimming strokes will be introduced gradually once your child has learned the basic core water skills and techniques.
